EDUCATION

Sardar Patel Institute of Technology

B.Tech in Electronics and Telecommunications Engineering (CGPA: 8.58/10)

Creative Public School and Jr. College

Higher Secondary Education (HSC: 88.8%)

Mumbai, India

Sept 2024 – 2028

Pune, India

May 2022 – May 2024

WORK EXPERIENCE

Six Ladders

July 2026 – Sept 2026

Software Engineering Intern

Remote

- Developed full-stack features using Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, and REST APIs.
- Built authentication, onboarding, Resume ATS, webinar registration, AI modules, and coding platform features.
- Integrated Google OAuth, GA4, email workflows, and external APIs while debugging production issues.
- Leveraged GitHub Actions and GCP for CI/CD, automated deployments, and infrastructure management.
- Resolved production issues, optimized performance, and participated in code reviews and Git workflows.

PROJECTS

LATTICE – AI-Powered Living Knowledge System | *React.js, Node.js, MongoDB, Redis, Socket.IO* | [Live](#) | [GitHub](#)

- Built an AI-powered collaborative platform during a 24-hour hackathon for dynamic knowledge management.
- Engineered a knowledge engine with 4 AI capabilities: decay, extraction, summarization, and automated tagging.
- Developed real-time collaboration with a scalable knowledge graph supporting remixing and lineage tracking.
- Integrated 3 capture channels: Chrome Extension, Telegram Bot, and Spotlight Search for seamless retrieval.
- Won 1st place as Domain Winner (Web Development) at the CSI-SPIT SE Hackathon.

Krypton – AI Scam and Phishing Detection Platform | *Next.js, Node.js, Python (ML), MongoDB* | [Live](#) | [GitHub](#)

- Built backend services for phishing analysis across 3 vectors: URLs, emails, and messages in real time.
- Engineered NLP classifiers to identify scam patterns and malicious content with contextual language analysis.
- Implemented explainable AI to surface key risk indicators and improve overall threat assessment transparency.
- Exposed REST APIs for 3 interfaces: web app, Chrome Extension, and Telegram Bot integrations.
- Streamlined inference workflows for responsive threat analysis across diverse communication sources and formats.

Scout – AI Workflow Intelligence Platform | *React.js, Node.js, MongoDB, Redis* | [GitHub](#)

- Built an AI-powered outreach platform with 3 modules for real-time execution tracking, monitoring, and analytics.
- Engineered a Redis-based execution engine supporting asynchronous multi-step workflow orchestration.
- Developed 2 ingestion pipelines for automated lead enrichment from CSV files and external data sources.
- Integrated LLMs across 3 tasks: message generation, lead scoring, and workflow optimization.
- Built scalable REST APIs with decentralized Filecoin audit logging for verifiable workflow execution records.

POSITIONS OF RESPONSIBILITY

Computer Society of India – SPIT

Sept 2024 – Present

Creative Head

Mumbai, India

- Led branding and execution for major technical events and hackathons attracting 4K+ registrations across India.
- Managed designers to deliver promotional assets and event creatives across 10+ technical events.

TECHNICAL SKILLS

Languages & Databases: C++, Java, Python, SQL, JavaScript, MongoDB, PostgreSQL

Frameworks: React.js, Next.js, Node.js, Express.js

Developer Tools: Cursor, Claude, Antigravity, Git, GitHub, Postman, Figma, MATLAB

ACHIEVEMENTS

- Secured 2nd place among 50+ teams at Coherence 2026 (MLSC VESIT) for building Scout.
- Won Domain Winner (Web Development) among 75+ teams at the CSI-SPIT SE Hackathon for LATTICE.
- 3× Hackathon Grand Finalist among 100+ teams.
- Solved 400+ problems across LeetCode, Codeforces, and HackerRank.
- LeetCode: 1546 — Codeforces: 1005
